Summary

Enthusiastic and detail-oriented aspiring Front-End Developer with a strong foundation in **React.js**, **JavaScript**, and modern web development practices. Skilled in building responsive, user-friendly interfaces and integrating APIs. Adept at translating design mockups into functional, optimized code while maintaining clean architecture and reusable components. Eager to contribute to collaborative projects, learn from industry professionals, and apply problem-solving skills to deliver high-quality user experiences.

In addition to front-end expertise, I have hands-on experience with backend services such as **Supabase**, **Convex**, and **Firebase**. Capable of setting up authentication flows, managing databases, and integrating real-time features to deliver full-stack web applications. Comfortable bridging the gap between client and server to create smooth, end-to-end solutions.

Skills

React, Next js, Typescript, Javascript, Tailwind, Flutter, HTML, CSS, Python (Basic)

Education

Btech. (CS & AI)

Newton School Of Technology • Sonipat, Haryana

08/2029

Just Started in August 2025

Languages

English, Hindi, Panjabi, Punjabi, Dogri, Punchi (MotherTongue)

Projects

Projects

- **Mockew AI** – An AI-powered mock interview platform built with **React.js** and backend integration for real-time responses, helping users practice and improve their interview skills. [Mockew AI](#)
- **Personal Portfolio** – Responsive, modern portfolio website showcasing my skills, projects, and experience, built with **React.js** and deployed with performance optimization in mind. [Portfolio](#)
- **Error Esports (in progress)** – A social media platform for gamers featuring tournaments, leaderboards, and community interaction, built using **React.js** with **Supabase** and **Convex** backend services.
- **Additional Projects** – Developed multiple other applications exploring front-end design, backend integrations, and real-time data handling.
